- Alico Node System
- Skylights
- Steel & Glass Assemblies
- Bespoke & Conventional Facades
- Customized Metal & Glass Facades
- Metal Cladding
- Alico Doors & Windows Systems
- Glass & Aluminium Balustrades

ALICO SYSTEMS RESEARCH AND DEVELOPMENT

ALICO SYSTEMS RESEARCH AND DEVELOPMENT

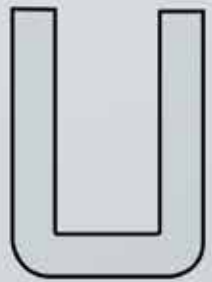

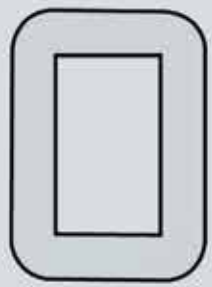

STRENGTHS IS OUR COMMITMENT - Since. 1976

One of our principle strengths is our commitment to innovation and to research and development. The ALICO Research and Development Team main role is to create the products of the future and to ensure that ALICO's systems are designed and manufactured to be fully integrated and compatible.

The main goal of developing systems is to bring all the architectural, technical, and aesthetic features together into one compact result. With its design and spatial quality, this product is equivalent or better to other good international systems in the market, and meets all the needs of contemporary architecture without concessions.

Our designers are equipped with the state-of-art 3D printing machine and 3D software to optimize their solution.

Newly developed systems will undergo in house testing regime in our own Test Rig, to ensure that performance complies with international and Specific Standards.

DESIGN & ENGINEERING

DESIGN & ENGINEERING

A comprehensive design service allows Alico to develop tailor made engineering solutions to fit the requirements of consultants and architects. Alico's Design Department employs fully qualified engineers, draftsmen and designers.

Alico has considerable experience in developing custom designed façade systems, thus meeting demanding architectural requirements taking into account complexities in building structure, while maintaining innovation in design.

PLANT OPERATIONS

PLANT OPERATIONS

With a total factory space of 24,000 m² and the capacity to produce 300,000 m² per annum of curtain wall, Alico has the capability of executing all its fabrication works internally which includes Aluminium Machining, Sheet Metal Processing, Powder and PVDF Coatings, Secondary Steel Works, Bending Works and Architectural Metal Works. Alico uses technically advanced CNC machineries for machining all its components manned by highly skilled labor to ensure maintenance of highest standards and workmanship quality.
